

# New Heavens and New Earth

By Craig Paardekooper

## The Sun and Moon

When we look up at our sky we see two great lights, the Moon and the Sun. Both appear about equal in size. That's why, during a solar eclipse, the Moon almost covers the Sun perfectly.

The reason they appear the same size is because –

$$(\text{distance of Moon from earth})/(\text{diameter of moon}) = (\text{distance of Sun from Earth})/(\text{diameter of Sun})$$

For the Moon, this ratio is

$$4.8 \times 4.8 \times 4.8$$

Notice that this approximates a perfect cube, and contains the factor

$$1.2 \times 1.2 \times 1.2 = 1.728$$

For the Sun, this ratio is

$$4.8 \times 4.8 \times 4.7$$

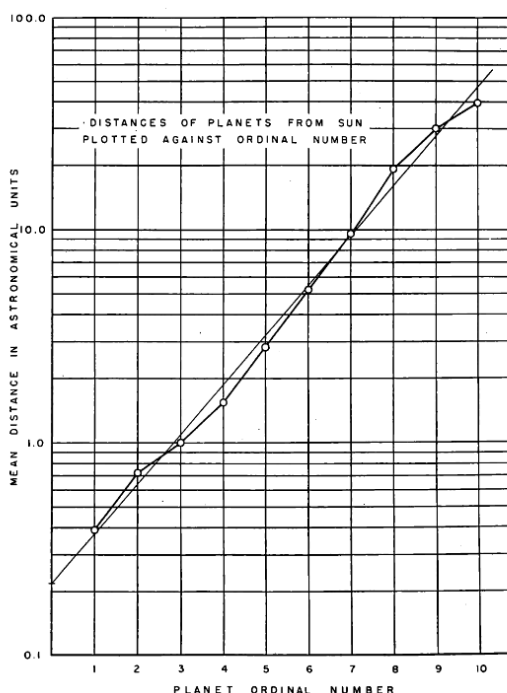

## The Planets

For the past 200 years, scientists have noticed that the distances of the planets from our sun do not appear to be random, but seem to follow a mathematical pattern. Many attempts have been made to define a mathematical equation that describes this pattern.

Finally, an equation has been found.

$$\text{Log}_{10}D = \text{Log}_{10}D_0 + n \times \text{log}_{10}1.728$$

When the log of the Distance is plotted against  $n$ , a straight line is produced, with a gradient of  $\text{log}_{10}1.728$ , and an intercept on the  $y$  axis of  $\text{Log}_{10}D_0$

As you can see, there is a slight oscillation above and below this line. This oscillation has a period (cycle length) of  $6.5 \times n$ , where  $n$  is the ordinal position of the planet from the Sun.

The line that perfectly bisects this oscillation, so that it is symmetrical on both sides of the line, is –

$$\text{Log}_{10}D = \text{Log}_{10}D_0 + n \times \log_{10}1.728$$

In other words,

$$\text{Distance} = D_0 \times 1.728^n$$

[For any individual planet, the oscillation factor must be taken into account. The oscillation is very precise, having a period of  $6.5 \times n$ , which can be expressed as  $(4 \times \pi/13) \times n$ . So when  $n = 6.5$ , then  $(4 \times \pi/13) \times n = 2 \times \pi$ . When a graph is plotted of  $D/1.728^n$  against  $(4 \times \pi/13) \times n$ , then the values of  $D/1.728^n$  for each planet in our solar system form a continuous repeating cycle – as you can see in the diagram below.]

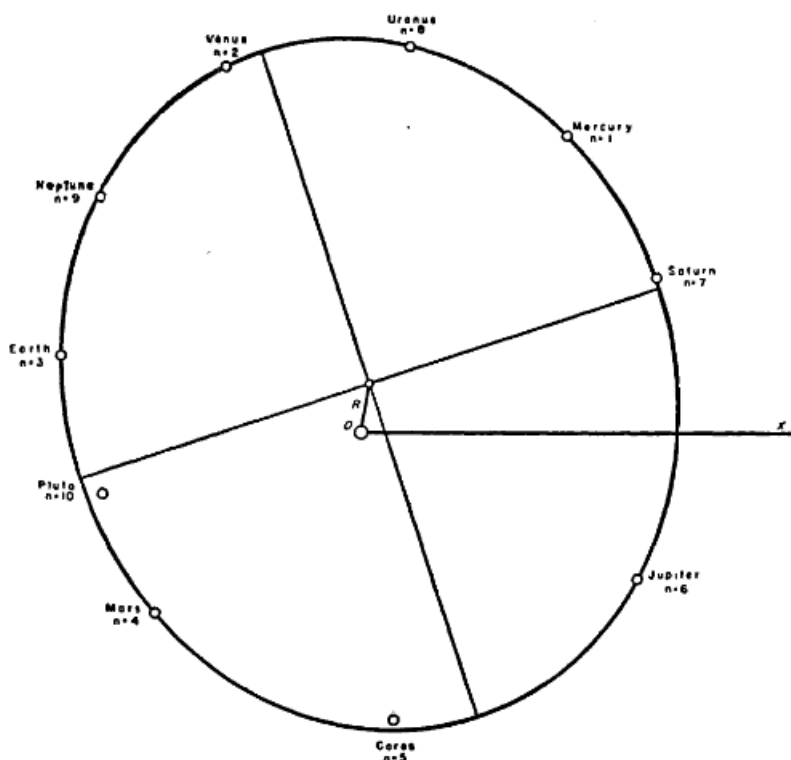

FIGURE 3

VALUES OF  $D_n / (1.728)^n$  FOR PLANETS OF THE SOLAR SYSTEM PLOTTED AGAINST  $(4\pi/13)n$ .

What this means is that the distance of each planet from the Sun and of each satellite from a planet is determined by powers of  $1.2 \times 1.2 \times 1.2$ , in other words powers of **1.728**.

Yes, there is an oscillation factor, but the line that perfectly divides the oscillation is –

$$\text{Distance} = D_0 \times 1.728^n$$

### Summary

Moon Distance from Earth	=	Moon Diameter	x	$4.8 \times 4.8 \times 4.8$
Sun Distance from Earth	=	Sun Diameter	x	$4.8 \times 4.8 \times 4.7$
Planet Distance from Sun	=	$D_0$	x	$(1.2 \times 1.2 \times 1.2)^n$

## Revelation

This cube of 12 appears in Revelations 21 at the very end of the Bible where God describes the dimensions of the New Heavens and New Earth using the symbol of the New Jerusalem. See - <https://t.me/bookofrevelations/296>

The cube in Revelations has dimensions 12,000 x 12,000 x 12,000

## Genesis

This cube of 12 also appears in Genesis 1 at the very beginning of the Bible where God describes the creation of the heavens and the earth . See new Jerusalem article - <https://t.me/bookofrevelations/296>

The cube in Genesis has dimensions  $288 \times 288 \times 288 = 12 \times 12 \times 12 \times 24 \times 24 \times 24$ . The Genesis cube is comprised of two sub-cubes  $6 \times 6 \times 6$  and  $48 \times 48 \times 48$ .

7	6	5	4	3	2	1
90 200 5	400 1 6	40 300 5	400 1 40	40 30 1	200 2	400 300 200 1 2
: נִרְאִיתָ בְּרֵא אֱלֹהִים אֵת הַשָּׁמַיִם וְאֶת הָאָרֶץ :						
earth the	and	heavens the		God	created	beginning the in
296	407	395	401	86	203	913

$90 \times 200 \times 1 \times 5 \times 400 \times 1 \times 6$ $= 600 \times 600 \times 600$	$40 \times 10 \times 40 \times 300 \times 5 \times 400 \times 1 \times 40 \times 10 \times 5 \times 30 \times 1 \times 1 \times 200 \times 2 \times 400 \times 10 \times 300 \times 1 \times 200 \times 2$ $= 480,000,000 \times 480,000,000 \times 480,000,000$
---	---

## Promise of Restoration

These discoveries should give you hope that Gods intention for a New Heavens and New Earth will be realised, just as it is described in Revelation 21, 22.

The spacing of our entire solar system was designed and framed around the  $12 \times 12 \times 12$  pattern, and the same pattern will be part of the New Heavens and New Earth.

Revelations says that soon after the tribulation, Christ will begin a 1000 year reign of peace, and this will be followed by the creation of a New Heavens and New Earth and the elevation of humanity back to its original state of extended lifespan. Creation will be restored and completed.

## The Restoration of Lifespan

When we look at the earliest traditions and historical records of the earliest civilisations we find that the recorded lifespans were considerably longer than those in modern times . The Bible records an exponential decrease in lifespan with each passing generation after the flood . The same decrease is recorded in the Babylonian, Sumerian, Chinese, Egyptian , and Indian king lists . See article - <https://t.me/Creationevidence/79>

## Greater Strength and Vitality of Ancient Creatures

Concomitant with this fall in lifespan was a fall from a greater strength and vitality reflected in the size and strength of animals during this ancient period . The animals were far larger and stronger than their modern equivalents . Here is an article where I list several of these creatures. – See article - <https://t.me/Creationevidence/35>

## Time's Arrow

There is a tendency towards greater disorder as time passes - a natural tendency is for any physical system to run down. It follows that the greatest order and perfection was in the beginning . And this will be restored at the end.
